

Alkaline means health!

Acids are chemical compounds that neutralize bases-alkaline. In our body they mainly occur as a result of the food that we eat and the beverages that we drink and our body exertion.

Active Hydrogen Professional Gel with super saturated hydrogen nano-bubbles creates rich gel structure.

Alkaline(base) solutions neutralize and remove unnecessary acids from our body.

Active Hydrogen Gel

Professional

Ingredients Tube 110ml

Aqua, acid complex, natural thickener, base complex, Mentha etheric oil, Active Minerals Complex, Potassium Sorbate, Metylchloroisothiazolinone/Methylisothiazolinone, Limonene.

Method of use

Apply on targeted - painful spot and leave it to dry. Repeat the process several times (4-5). To avoid a feeling of tightness, wipe over targeted area with wet hand. Avoid contact with eyes and mucosa. Use within 30 days after opening the product. Expiration date indicated on the edge of the tube.

Notification

In case of inflammations, acute and chronic symptoms it is recommended to use the Active Hydrogen PROFESSIONAL Gel at least 2 times per day, in the morning and evening, for several days. The first results are visible after 3 days. The product contains ingredients which may for some people cause skin irritation. Active Hydrogen Gel contains Mentha etheric oil and Limonene.

We recommend sensitivity test prior to use.

Disclaimer

Claims and statements on this product, everything about it, do not represent any diagnosis, treatment, prevention nor treatment of diseases or conditions.

Sensitivity test

Apply a small amount of Active Hydrogen PROFESSIONAL Gel in the area behind the ear or on the inside of the elbow or from the upper forearm down to the palm. Rub in and leave to dry. If within 24 hours irritation, redness, itching, swelling or other allergic reaction occurs, wash immediately with plenty of water, stop using the product and consult a physician.

Do not apply to open wounds or damaged skin. If you apply it to your face, be sure to check your sensitivity by conducting the sensitivity test. Avoid using near eyes area. Not to be taken orally.

Unlike many antioxidant products, which can be found on the market, and which neutralize all free radicals, hydrogen is the only one that selectively neutralizes only those which are harmful and dangerous.

Hydrogen helps cells to create antioxidant enzymes-catalase, glutathione peroxidase and superoxide dismutase - which naturally protect the body from the damaging effects of free radicals.

Cell hydration

Specially developed formula of Active Hydrogen PROFESSIONAL Gel is highly rich with hydrogen nano-structure, which causes a reduced average density and cluster water size thus makes it easier to penetrate into the human cells.

- ✓ Reduces and stops the inflammatory process
- ✓ Reduces and eliminates pain after injuries and inflammations
- ✓ Leads to a reduction and disappearance swelling and bruising
- ✓ Neutralize negative effects of excretion of lactic acid in the muscles
- ✓ Speeds up recovery process after injuries
